

CI HUB Press Release

CI HUB has announced a plethora of new integration partners at Adobe MAX - from printing platforms such as Gelato to DAM systems such as OpenText and Censhare, and MAM platforms such as Mediamid and OMN, this tech startup has gone full pelt in the run-up to creativity's biggest event of the year, rolling out their Google Workspace integration as well as a new pricing model designed to provide all users with access to CI HUB, from individual aspiring designers to full-suite enterprise marketing teams.

For those who are curious, CI HUB is the leading digital asset aggregator, enabling creatives and business users to work smarter and more seamlessly without hopping between windows. The philosophy behind CI HUB Connector for Adobe Creative Cloud, Microsoft Office365 and Google Workspace is to be a single source of access to centralised data and assets in your marketing ecosystem.

CI HUB's portfolio of partners covers both on-premise and cloud-hosted solutions with data models for DAM, MAM, PIM, MDM, or CMS. In addition to marketing data solutions, they also connect to stock providers and cloud storage services.

[Censhare](#)

“We have now extended censhare with the CI HUB Connector, enabling our clients to instantly access and edit centrally hosted content from censhare within Adobe Creative Cloud and Microsoft Office applications. This drastically simplifies the day-to-day workflow of creatives and business users alike and demonstrates our range of user-friendly, lightweight use cases.”

[Gelato Printing](#)

Today they've announced they're going physical with their Gelato partnership! Gelato is an on-demand printing service designed to bring your imagination to life

as swiftly as possible. Users can now create assets and have them printed anywhere in the world with just one click.

Andy Michalski, CEO of CI HUB, said “we are so excited to be partnering up with Gelato! there's nothing more rewarding than seeing the physical fruits of your digital labour come to life as swiftly as Gelato makes it possible. From ideation to creation, we hope our customers are as impressed with the enterprise speed and agility that this creative partnership has fuelled!”

Keeppeek

Keeppeek and CI HUB announced a major new partnership with the integration of the revolutionary connector for Adobe Creative Cloud and Microsoft Office.

For Thomas Larzillière, CEO of Keeppeek, "this integration will provide us with a great opportunity to leverage the collaborative features around the Adobe suite, a key topic to bring a seamless user experience. Our customers as well as their agencies and creative partners will be able to work in a fully integrated environment, and access without constraints their assets and data stored in Keeppeek without having to leave their preferred creative or office products ecosystems such as Adobe or Microsoft."

Lookatme

“Lookatme is proud to announce a new integration with CI HUB, bringing you the CI HUB Connector.

This exciting new development will enable Lookatme and Adobe to work seamlessly and efficiently with your digital assets.

With the Lookatme CI HUB Connector, authorised users will be able to access previews for InDesign files, browse Lookatme folders and images from within the Adobe applications, link to assets and relink when needed, switch between versions of assets, and check for updates on placed assets.

This integration is part of the new Lookatme7, a major upgrade to our highly successful platform.”

Marvia

Merlijn Bruijnes, CTO of MarTech software Marvia, said “We are really excited about partnering with CI HUB to allow Marvia clients to access and use all digital assets stored in their Brand Portal within their Adobe CC and Microsoft Office applications. This new integration accelerates the entire creative process and modification of digital assets.”

OMN

"The new partnership with CI HUB is a natural evolution in our efforts to make the day to day lives of our customers as comfortable and intuitive as possible.

With the OMN CI HUB connector, customers can instantly access images, videos, graphics and documents which can be researched, opened, edited and saved directly, without detours via OMN system and without leaving the Adobe or Microsoft Office application they're using."
